

Dancor *WATCH* and Lock Service

Let Us Lock in the Price That's Right for You

WHAT IS DANCOR WATCH AND LOCK SERVICE?

Many customers know the price they would like to pay for their electricity and/or natural gas and believe the market price is too high today, but their target may arrive at their price some time in the future. Until then, they wait until the market reaches an acceptable price and then contact brokers, only to find that the market has moved against them before completing their purchase. This is frustrating for the customer and supplier alike.

Dancor WATCH and Lock Service solves this problem by having customers agree in advance on the desired price and contract terms. Dancor Energy then shops the markets and locks in that price the moment it becomes available. We transact in the electricity and natural gas markets daily; hourly: when we see the price you want, we lock it in for you. Pricing opportunities come and go quickly. Dancor WATCH and Lock customers are already positioned to get their desired price. Price requests are good until canceled or modified. Take advantage and lock your price for 3 to 5 years or more.

HOW IS THE PRICE CALCULATED?

You set the price that fits into your budget and the type of delivery service you desire and the process begins. We enter your request into our Dancor WATCH system and continuously shop the markets in "Real Time Analysis". Once the market hits your price, we buy your requested volumes and automatically begin the process of setting up delivery and switching your account with your host utility. We then notify you that your order has been filled and when your deliveries start. It's that simple.

VALUE AND BENEFITS

- Select the price you are willing to pay for electricity and/or natural gas
- Choose service plans and contract terms before you transact
- Eliminate market monitoring, we shop the market daily on your behalf
- Automatically locks in your desired price the moment the market hits

THIS PRODUCT IS RIGHT FOR YOUR BUSINESS IF:

- You want to buy competitively, but current prices are too high
- You believe market prices will fall or dip in the future
- You know the price or savings level you desire

GETTING STARTED
